

## Home Practice – Lessons 1 and 2

We have explored improvising on the black keys to develop listening and musicality. It would be great if you could have a practise at this at home.

### '2 Black Notes' backing track.

Play using the groups of 2 black notes on the piano - any of these notes will sound good.

- Try to play in time to the music.
- Try to use different groups of 2 notes – high and low.
- Try to play different rhythms – some fast, some slow.
- Try playing some loud and then some soft.
- Try playing some 'bouncy' and some 'smooth'

For the '**3 Black Notes**' track - repeat as above but with the groups of 3 black notes  
For '**Any Black Note**' – repeat as above with any black note.

The main thing is to have fun!

Please contact me if you need any other information.

Thank you for your support.
